Helpful tips in using Cotton Yarn

When winding the yarn and
spooling it, give it a little twist. It will continue
to twist on its own after this.
When joining ends, always start
at the end of the row. You can
work the end into the seam. If by
chance a single strand breaks
during knitting, just overlap the
two ends and give it a little twist
and continue knitting. You may
use to sew the garment together.
Take about an 18" length of
yarn and twist it until it curls up when
you slack off the tension. This
becomes very strong.
